Spot report: 31 dead, 16 missing, over 200 injured by Typhoon Hagibis

Background

On 13 Oct 2019, Typhoon Hagibis has brought amounts of rainfall in many areas, causing more than a dozen rivers to overflow. Moreover, these typhoon caused rivers to flood and triggered landslides in central and northeastern parts of Japan and prefectures near Tokyo. The water levels of some rivers remain high and the ground has become loose. Japan's Land and Transport Ministry reports that 21 waterways collapsed, including the Chikuma River in Nagano Prefecture, northwest of Tokyo. Roads was completely submerged with muddy water. More than 52,000 households in Tokyo and surrounding areas are still without power due to Typhoon Hagibis. On 14 Oct 2019, people in Japan are dealing with the aftermath of Typhoon Hagibis. The death toll stands at 43 as cleanup efforts are underway in many areas. In addition to the fatalities, 16 people are listed as missing. Another 202 were injured during the weekend storm.
Actions Taken

Japan sent tens of thousands of troops and rescue workers to save stranded residents and fight floods caused by one of the worst typhoons to hit the country. Evacuation centres filled up with residents, while some perished on their way to seek shelter, washed away by the flooding.

ASSESSMENT OF NEEDS –

Severity ranking of the concerns effect in the ASEAN region.
